

The CleanEX range of ultrasonic cleaners are portable benchtop machines designed for cleaning small items such as laboratory, jewellery and dental / medical equipment. As with all Everest Ultrasonic machines, the CleanEX range is fitted with the automatic shut off device for low water levels which prevents any burn out of the heaters.

General Features

- Tank capacities from 4 to 28 lt.
- Frequency: 28 Khz
- Housings and construction made of stainless steel (EN 1.4301/AISI 304)
- Automatic shut off the heating element at insufficient water level
- Adjustment of cleaning time and liquid temperature
- In xx02 and xx12 models have ultrasonic power adjustment: 50%, 75%, and 99%
- High-efficiency piezoelectric ultrasonic transducers with special ceramics
- Drainage valve (except for cleanEX-4XX series)
- 24 months warranty
